HEALTHCARE CLEANING – THE DIFFERENCE

WHAT IS HEALTHCARE CLEANING?

Healthcare cleaning is more than just janitorial. Healthcare facilities require Infection Control. State Government and other regulatory agencies are increasing the visibility and scrutiny of cleaning protocols in hospitals and clinics across the country.

Healthcare cleaning means:

- Cleaner facilities with fewer germs
- Healthier employees
- A more productive workplace
- Reduction of HAI's (Hospital Acquired Infections)
- More effective cleaning

THE HEALTH FACTOR

CDC estimates that ten different diseases are responsible for 84% of all hospital visits. It makes sense that clinics and hospitals be especially vigilant with their cleanliness and disinfection. As Samuel Goldwyn once quipped, "A hospital is no place to be sick." Nosocomial infections are a serious matter.

In the US it is estimated that 9.2 out of 100 patients acquire nosocomial infections.

Best Practices, including the proper equipment, PP&E and efficacious cleaning solutions are paramount in the cleaning process.

20.6% of ICU patients acquire nosocomial infections during or after their stays.

The Backbone of our cleaning system:

HEPA Filter Backpack Vacuums
- Multi-level filtration system removes and captures 99.97% of airborne particles 0.3 micron or larger
- Improve indoor air quality
- Reduce dusting load
- Are lightweight and easy to use
- Clean hard to reach areas
- Clean 7,407 ft²/hr (upright: 3,243 ft²/hr)

Virex Plus Disinfectant
- 3-minute (or less) contact time
- Fungicidal
- Automatic dilution system ensures efficacy

Rubbermaid Hygen Microfiber Flat Mop system
- Pull dust and dirt onto the mop head instead of spreading them across floors
- Remove bacteria from floors
- Require less water to clean
- Density of fibers provides 40 times more cleaning surface than traditional mop heads
- Cleans floors 45% better than string mops

3M Easy Trap Sweep and Dust Sheets
- Trap up to 800% more dirt, dust and sand than traditional commercial dust cloth
- Versatile for wet and dry surfaces
- Disposable but sustainable, made from 60% recycled content
- Conforms and attaches securely to high dusters and floor dusters
